

THE REALITEA PROJECT

- ReaLiTea (Research Literacy of Teachers) is an Erasmus+ project (KA220) that seeks to enhance pre-service and in-service teachers' engagement in and with research regarding foreign, second, and additional languages.
- We do this by fostering research literacies, addressing both the attitudes and competences associated with reading, using, carrying out, and sharing research in communities of practice.
- In doing so, we build sustainable connections between theory and practice in the context of language teachers' professional development.

ReaLiTea Project Team:

TU Dortmund University (Germany)

Carolyn Blume, Raúl García, Christina Ringel

Ankara Social Sciences University (Türkiye)

Aysel Sarıcaoğlu

OASIS/University of York (U.K.)

Emma Marsden

University of Bergen (Norway)

Kenan Dikilitaş

University of Stuttgart (Germany)

Saskia Schabio, Yela Schauwecker

University of Thessaly (Greece)

Achilleas Kostoulas, Chrysoula-Xeni Ntai

University of Vienna (Austria)

Julia Huettner, Julia Pittenauer

ReaLiTea
Research Literacy of Teachers

The ReaLiTea (Research Literacy of Teachers) project draws from and enriches the research literacy of pre-service and in-service foreign, second, and additional language teachers. It seeks to address both the attitudes and competences of engaging in research related to teachers' classroom practices.

Target audiences:

- Pre-service teachers
- Classroom teachers
- Teacher educators
- Staff developers

**Co-funded by
the European Union**

Visit the ReaLiTea
website:

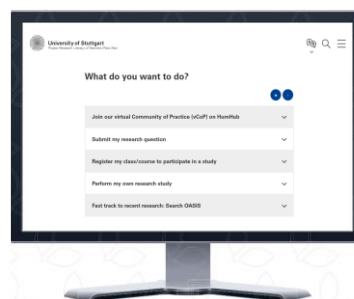

With ReaLiTea@Stuttgart, we're creating a virtual space in which the ReaLiTea community can grow and connect. Here's how we contribute:

Interactive research space

We provide a platform where pre- and in-service teachers can upload their questions so that researchers can support them in investigating their questions.

Study participation made easy

Our tool allows pre- and in-service teachers interested in research to register their classes, making it easier for researchers to get in touch with them for collaborative studies.

Virtual Community of Practice

We've built a space on HumHub where teachers from seven participating countries can network, share insights, upload materials, and offer feedback.

Quick access to research via OASIS

Users can customize filters to quickly find concise summaries of research articles that match their interests – an efficient way to stay on top with the latest research.

Voices from the community:

"Sharing my lesson plans with other teachers makes me feel like I'm contributing something to the community while also benefitting from the feedback I get."

"The ReaLiTea virtual community is a great opportunity for connecting, not just with other teachers, but with students and researchers interested in what I have to say!"

Features:

- 🌱 Participatory
- 🌱 Grassroots
- 🌱 Collaborative

Target audiences:

- 🌱 Pre-service teachers
- 🌱 Classroom teachers
- 🌱 Teacher educators
- 🌱 Staff developers

**Join us and become part
of the growing ReaLiTea community!**

Information on the ReaLiTea project is available in English (on our website), German (at TU Dortmund and University of Vienna), Modern Greek (at University of Thessaly) and Turkish (at ASBU).

Project goals:

- 🌱 Creating learning opportunities
- 🌱 Tracking personal development
- 🌱 Making research accessible
- 🌱 Offering models for research outputs
- 🌱 Building communities
